

523 S. Cook Street – Contributing (ARC Case 02-24)

At this location is a one-and one-half-story, frame Bungalow built ca. 1920. The bungalow has a continuous poured concrete foundation, a gable roof of hexagonal asphalt shingles, an exterior wall brick chimney and an exterior of vinyl siding. The main (W) façade has an original partial-width, projecting gable roof porch with tapered wood posts on tapered brick piers and a vinyl siding closed frame railing. The main entrance retains its original glass and wood door with an aluminum and glass storm door. Windows are original, one-over-one double hung Craftsman style with multi-paned upper lights. At the roofline on the main façade is a large, shed roof dormer with a wood shingle exterior and paired, single-light, Craftsman-style casement windows. At the eaves are knee brace brackets and exposed roof rafters on both the dwelling and dormers. At the basement level are original two-light awning windows. On the south façade are two original, projecting gable roof bays. On the rear façade is a ca. 2002, gable roof addition that connects the house to the garage.

At the rear is a one-and one-half-story, two-bay, frame garage with a side gable roof of hexagonal asphalt shingles, a wood shingled, gable roof dormer at the roofline and rebuilt glass and wood garage doors. A lateral addition on the south façade has a projecting bay on its south façade with a triple set of windows, a pent roof. In the gable field of the addition are wood shingles. – **Contributing**
